CITY COUNCIL

MEDIA RELEASE

Port Augusta City Council continues to streamline and improve operations

Port Augusta City Council (Council) is committed to the ongoing review and improvement of all aspects of our business to ensure we are delivering effective and efficient services to the Port Augusta community.

Council recently streamlined our management team to improve strategic and operational efficiencies, achieved by combining our corporate and community functions. As a result, Council has reduced our number of Directors from four to three.

Council will also undertake a review of our structures and systems across the organisation to identify opportunities for improvements. Improvements are likely to include more effective team structures, improved workflows, enhanced systems which better support staff and reduced expenditure to ensure Council delivers the best possible services and programs.

Council is also currently undertaking a Service Range and Level Review which will identify whether each of our current services and programs align with our strategic priorities.

In combination these reviews and realignments reflect Council's commitment to improving all aspects of our operations. We will continue to update the community regarding key improvement achievements.
