# TREE PLANTING GUIDELINES

(Reference Only)

- Trees shall be planted in the footpath areas only when a minimum width from the **kerb to the allotment boundary of 3.5 metres exists**.
- No tree can be planted closer than **10 metres** from an intersection if the street width is **more than 10.5 metres between the kerbing**.
- No tree can be planted closer than **15 metres** from an intersection if the road width is **less than 10.5 metres between the kerbings**.
- The **Council will determine** what tree species shall be planted in any street or locality.

**Note:** **No tree/s shall be planted** by other than Council employees unless prior authorisation has been attained from the Council. Trees shall become the property of the Council.

**Please Note:** Council purchase their trees reasonably established (to assist with a better survival rate and to help fight against vandalism) and due to the fact that all trees are seasonal and subject to supply from independent nurseries, and not all trees are available at all times this will result in lengthy delays and periods of unavailability. Please be advised that your application could take twelve to eighteen months to be completed.
